

MAP3

PCR

Based on the highly successful MAP1, the MAP3 further refines the driving experience. The tyre incorporates a new closed shoulder designed to minimise noise resonance in the tread area for reduced cabin noise.

The MAP3 also features a new construction design to maintain a stable contact patch for improved braking performance as well as excellent overall traction.

FEATURES & BENEFITS

- 1 Closed shoulder design minimises noise resonance in the tread area for a quiet and comfortable ride.
- 2 Advanced construction design maintains a stable road contact patch for improved braking performance and excellent traction.
- 3 Solid centre rib delivers excellent handling response and braking performance.
